# Portfolio

your plastic partner

Founded in 1988 as a result of vision and enterprising capacity of the founders, Plasmitec is made up of a team of young people, but experienced, highly competent, motivated and dynamic.

Based on a lightweight, economical and responsive structure, together with the presence of a high percentage of senior skilled workers, allows the company to face with security the challenges placed by the market.

Each individual is different, as well as each customer, so for every customer who exposes us a problem, we offer a custom solution.

At the end of more than 25 years Plasmitec has a consolidated position in the market, offering multiple solutions in plastic in order to ensure customer satisfaction.

This is a concern shared and felt by all our employees.

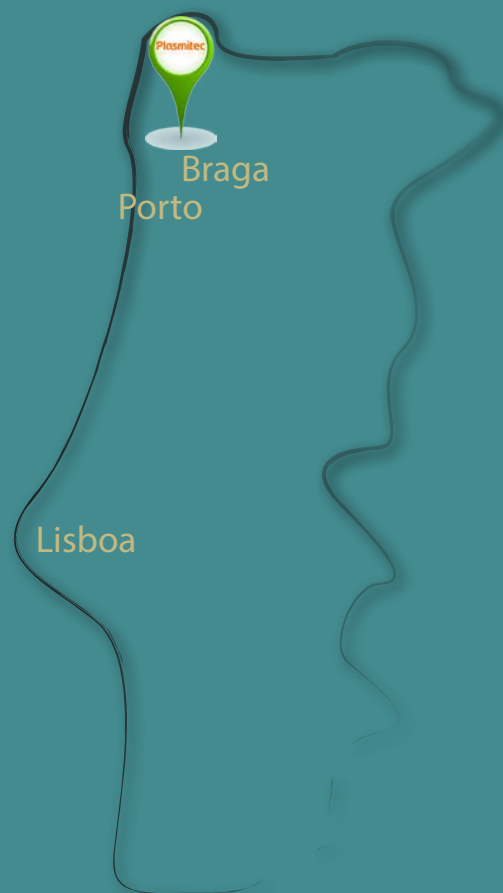

Thorough knowledge of all kinds of technical plastics, the form of technical partnership regarding the cooperation with customers and suppliers spread all over Europe allow us besides our pride in the past, a high confidence in the future.

## Plasmitec location

The modern and functional facilities, are located in Braga near one of the most important highways (Porto - Valencia), allows a rapid communication with customers and suppliers, thereby enhancing a rapid response to all requests.

The productive lay-out was designed so that the various stages of manufacture communicate with each other smoothly, simple and effective. This, coupled with the continuous production, as well as modern and technologically capable equipment, allow us to safely obtain the price, time and quality demanded by our customers.

Thus we do not only offer plastic parts. We are, indeed, capable of developing global solutions that meet the requirements of our clients' projects, ensuring on-line monitoring of the client throughout the development process, including support from the engineering of the product phase, through implementation of prototype parts and tools, to the final definition of the product and the series production tools

## Policy of the company

### Customer Satisfaction

Through the organization's commitment to fully meet customer requirements, the statutory and regulations and other.

Promotion of continuous improvement of processes and services associated with its activity, through a systematic search of increased performance (technical and logistical) and cost reduction.

Relentless pursuit of widening the range of services.

### Satisfaction of employees

By continuing increase in their level of motivation, as a result of appropriate training to the performed tasks.

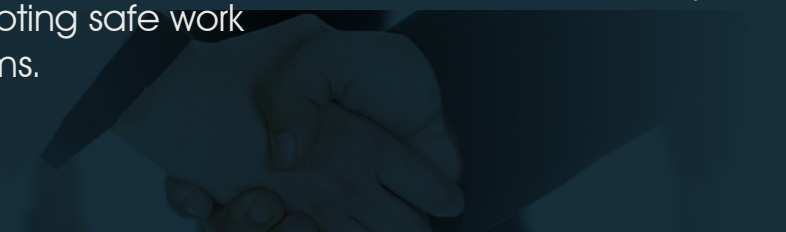

Providing a safe and healthy work environment by supplying them with personal protective equipment and promoting safe work systems.

### Satisfaction of investors

By improving the company's image and return on invested capital.

### Satisfaction of society

By contributing to the existence of a modern industrial base that generates wealth and with minimized environmental impact.

Plasmitec also has a sector for pad printing, assembly and welding with various machines with various configurations that allow us to meet the needs of our customers, with the strategy of proposing a global solution to their projects. The integration processes on the same supplier, allows gains in delivery, logistics and handling costs, contributing to the competitiveness of the global chain of production.

This process also occurs in a specific area of our facilities, designed to have all the necessary conditions to specified levels of quality and reproducibility, but also to minimize environmental impacts and risk to the health of the workers.
